DESCRIPTION

The Schmitz Strong Connect is a multi-functional modular linear lighting system that provides creative and practical design solutions for a wide variety of interior applications. The trunking forms the backbone to accept snap-in modules for general illumination and accent lighting, as well as accommodating non-lighting functions such as occupancy or daylight sensors within a single system. A selection of trunking connectors allows the system to be designed for continuous linear runs or in square, rectangular, or crisscross grid patterns to highlights areas of interest. The Strong Connect system is suitable for retail, warehousing, data centers, office, and hospitality settings. The system offers surface or suspended mounting options, as well as a choice of light distributions to satisfy the needs of many lighting applications.

SAMMY SCREW

- No pre-drilling required
- Installs into steel range from 20 gauge -1/2" thickness
- Saves time from traditional methods
- Reduces installation costs
- Quick to install using the sammys nut driver with an 18v cordless drill/driver
- A standard screwgun with a depth sensitive nosepiece should be used to install Teks. for optimal fastener performance, the screwgun should be a minimum of 6 amps and have an rpm range of 0-2500.
- Manufactured in the USA

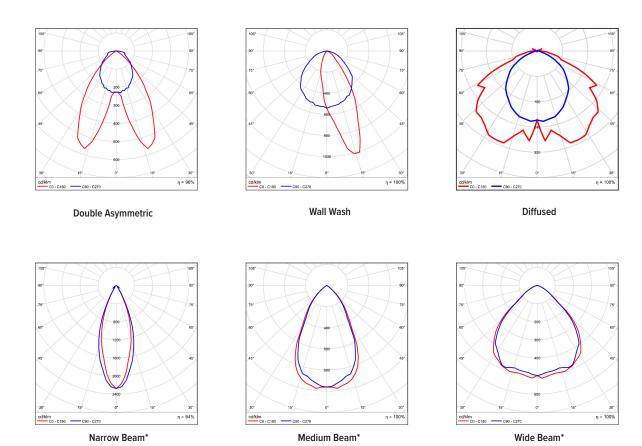

Looped Cable
